

## **875-1i - Versatile Thermal Imager Overview**

With the Testo 875-1i, you can identify energy loss in building thermography, helping your customers to save on expensive heating costs. You therefore save time, energy and money in industrial thermography as well as in building thermography, and ensure more security all round. You can carry out completely non-destructive tests on materials and components in industrial thermography with the Testo 875-1i. This allows you to reveal problems in industrial maintenance and production monitoring before a malfunction occurs or re risks develop. And for good measure, you can create a real image in parallel to the thermal image thanks to the built-in digital camera. This makes documentation and assignment easier for you.

### **Features**

- Image quality: IR resolution 160 x 120 pixels
- SuperResolution technology to 320 x 240
- Thermal sensitivity <50mK
- Built in digital camera
