

875-2i - Versatile Thermal Imager Overview

You can carry out completely non-destructive tests on materials and components in industrial thermography with the Testo 875-2i. The high temperature option extends the measuring range from +350 °C to +550 °C. Using the built-in digital camera, you can create a real image in parallel to the thermal image. So as to make the documentation and assignment of real and thermal images even easier for you, the Testo 875-2i infrared camera is also equipped with voice recording. This means you can save comments to go with your images using the headset.

Features

- Image quality: IR resolution 160 x 120 pixels
- SuperResolution technology to 320 x 240
- Thermal sensitivity <50mK
- Built in digital camera
